- ["Choosing the Right Path" explores the options open to companies to reach new levels of performance and growth.](#)

Competition is Everywhere

"Hello everybody out there using minix

I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones. This has been brewing since april, and is starting to get ready. I'd like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons) among other things). I've currently ported bash(1.08) and gcc(1.40), and things seem to work. This implies that I'll get something practical within a few months, and I'd like to know what features most people would want. Any suggestions are welcome, but I won't promise I'll implement them :-)

Linus (torvalds@kruuna.helsinki.fi)
PS. Yes - it's free of any minix code, and it has a multi-threaded fs. It is NOT portable (uses 386 task switching etc), and it probably never will support anything other than AT-hard disks, as that's all I have :-("

~ Linus Torvalds, 1991
..... Inventor of Linux

Definition One, Inc.

Definition One, Inc., (a subsidiary of CPath Solutions) is a corporate education, training and learning organization offering customized education and Consulting Solutions that increase client performance. The company works with its clients to implement strategic initiatives by educating the organization through a variety of techniques including its proprietary offering, Definitions.

Telephone: (212) 684-6700
